

General

Advisor® Tender 1.0 is an offline version, based on Advisor® 5.3.

This version is designed to work with the latest Windows operating system and with DiaMobile® XL and DiaScan® S+ systems in tenders where no internet connection is available, which prevents the option of working with one of the latest and advanced online versions.

1. Operating systems

Advisor® Tender 1.0 is supported by Windows 7 Professional 64-bit and Windows 10 Pro.

2. Advisor® Tender features

Advisor® Tender is designed to support the tenders working environment with DiaMobile® XL and DiaScan® S+ systems only, therefore the following features are disabled in this version:

- Laser Marking
- Working with Galaxy files
- Mix Mapping

3. File format

Advisor® Tender has a unique file format that can be opened by Advisor® Tender versions only.

Stones scanned by this version cannot be opened by any other Advisor® version.

4. Compatibility with Sarine systems

Advisor® Tender can be installed on the following configurations:

- DiaMobile® XL system
- DiaScan® S+ system
- As a standalone working station
